二、wysiwyg-editor 介绍.....	2
三、Nodejs 中使用 wysiwyg-editor.....	2
三、汉化 wysiwyg-editor.....	2
四、自定义 wysiwyg-editor 的导航条.....	3
五、Express Cms 中配置 wysiwyg-editor 上传图片.....	3

## 一、内容页面的布局

The screenshot shows a web browser at localhost:3000/admin\_express. The interface has a sidebar menu on the left and a main content area. The sidebar menu includes sections like '管理员管理' (Admin Management), '分类管理' (Category Management), '轮播图管理' (Carousel Management), and '内容管理' (Content Management). The main content area is titled '增加文章' (Add Article) and contains a form with three tabs: '基本信息' (Basic Information), '内容详情' (Content Details), and 'seo设置' (SEO Settings). The '基本信息' tab is active, showing fields for '所属分类' (Selected Category) with a dropdown menu set to '网站', '内容标题' (Content Title) with a text input, '封面图' (Cover Image) with a '选择文件' (Select File) button and the text '未选择任何文件', '作者' (Author) with a text input, '排序' (Sort) with a text input set to '1000', '状态' (Status) with radio buttons for '显示' (Show) and '隐藏' (Hide), and '加入推荐' (Add to Recommendation) with checkboxes for '精品' (Excellent) and '热门' (Popular). A '提交' (Submit) button is at the bottom of the form.

## 二、wysiwyg-editor 介绍

一个设计精美的基于 HTML5 的 WYSIWYG HTML 编辑器，它非常小但是非常强大。我们不仅可以在 nodejs 中使用它，还可以在 vue 、 react 、 angular 前端框架中使用，并还可以在 PHP, .NET, Java, and Python 等其他后端语言使用。

- 1、<https://github.com/froala/wysiwyg-editor>
- 2、<https://www.froala.com/wysiwyg-editor/docs/options>

WYSIWYG 的是 what you see is what you get 的缩写。

## 三、Nodejs 中使用 wysiwyg-editor

```
<!-- Include Editor style. -->
<link
href="https://cdn.jsdelivr.net/npm/froala-editor@latest/css/froala_editor.pkgd.min.css"
rel="stylesheet" type="text/css" />
<!-- Create a tag that we will use as the editable area. --><!-- You can use a div tag as
well. -->
<textarea></textarea>
<!-- Include Editor JS files. -->
<script type="text/javascript"
src="https://cdn.jsdelivr.net/npm/froala-editor@latest/js/froala_editor.pkgd.min.js"></s
cript>
<!-- Initialize the editor. -->
<script> new FroalaEditor('textarea');</script>
```

## 三、汉化 wysiwyg-editor

<https://www.froala.com/wysiwyg-editor/languages>

- 1、引入 zh\_cn 的语言包
- 2、配置 language: 'zh\_cn'

## 四、自定义 wysiwyg-editor 的导航条

<https://www.froala.com/wysiwyg-editor/docs/options#toolbarBottom>

```
new FroalaEditor('#content', {  
  height: 300,  
  language: 'zh_cn',  
  toolbarButtons: [ ['bold', 'strikethrough', 'subscript', 'superscript', 'outdent', 'indent',  
    'clearFormatting', 'insertTable', 'html'], ['undo', 'redo']],  
  toolbarButtonsXS: [ ['bold', 'strikethrough', 'subscript', 'superscript', 'outdent', 'indent',  
    'clearFormatting', 'insertTable', 'html'], ['undo', 'redo']]  
});
```

## 五、Express Cms 中配置 wysiwyg-editor 上传图片

<https://www.froala.com/wysiwyg-editor/docs/options#imageUploadURL>

```
new FroalaEditor('#content', {  
  height: 300,  
  language: 'zh_cn',  
  imageUploadURL: '/<%=adminPath%>/goods/doUpload',  
});
```

注意：后台返回数据格式：{link: 'path/to/image.jpg'}

```
router.post("/doUploadImage", multer().single('file'), async (req, res) => {  
  var article_img = req.file ? req.file.path.substr(7) : "";  
  res.send({link: "/" + article_img});  
})
```
